

The diagram consists of four interlocking chevrons arranged in two rows. The top row has a light green chevron on the left and a light orange chevron on the right. The bottom row has a light blue chevron on the left and a light red chevron on the right. Each chevron has a thick black outline. The chevrons are interlocked such that the right side of the top-left chevron fits into the left side of the top-right chevron, and the right side of the bottom-left chevron fits into the left side of the bottom-right chevron. Additionally, the bottom-right chevron is slightly offset to the right and down relative to the top-right chevron, creating a staggered appearance.
